## PROFESSIONAL SUMMARY

AI Engineer with 2.5+ years of industry experience delivering high-performance, cloud-native applications and distributed backend services. Skilled in C++ and Python, with expertise in backend architecture, API development, and containerized deployments using Docker and Kubernetes. Recognized for building scalable, secure solutions and achieving measurable performance improvements, backed by hackathon wins and competitive programming achievements.

## SKILLS

- **Languages:** Python, C++, Java, JavaScript, SQL
- **Cloud Technologies:** AWS, Docker, Kubernetes
- **Frameworks:** Fast API, Spring Boot, React, Django, Node JS
- **Tools & Platforms :** Git, MySQL, VS Code, Claude
- **Core Concepts:** Agentic AI, Gen AI, Distributed Systems, Microservices, REST APIs
- **Soft Skills:** Problem Solving, Leadership, Team Collaboration, Communication, Time Management

## EXPERIENCE

- **Ngenux Solutions** Hyderabad, India  
*AI Engineer* Feb 2026 - Present
  - **Intelligent document processing (Gen AI, FastAPI, Agentic AI, AWS):** Building an AI-powered Intelligent Document Processing (IDP) platform as the sole developer, designing and implementing a multi-agent AI system that performs document classification, quality validation, data extraction, normalization, and confidence-based verification. The platform automatically detects unsupported, blurry, or improperly scanned documents and provides actionable feedback to users. Responsible for end-to-end backend development and AWS infrastructure, using Python, FastAPI, EC2, Lambda, Docker, S3, IAM, and authentication services. Designed scalable, automated document workflows that significantly reduce manual effort, improve accuracy, and process documents within minutes..
- **Decimal Point Analytics** Nashik, India  
*Software Development Engineer* Mar 2024 - Jan 2026
  - **Global Dealer Operations & Marketing Platform (FastAPI, Microservices, Cloud):** Designed and implemented 100+ secure microservices and REST APIs with role-based access control, deployed in a multi-cloud environment. Optimized distributed backend processing by 30% through region- and product-level data aggregation across multiple data sources. Strengthened system security and availability with cloud-based deployment and API gateway integration.
  - **Automation Alert System (Python, Data Processing, Scheduling):** Built an event-driven automation system to extract, process, and distribute financial data from multiple sources, reducing manual effort by 80%. Implemented distributed job scheduling and automated email delivery for real-time insights. Enhanced decision-making and operational efficiency by ensuring low-latency, reliable data pipelines.

## PROJECTS

- **AI-powered Financial Insights Dashboard (Hackathon, Distributed APIs, Cloud):** Built a scalable, cloud-based financial insights dashboard using microservices and real-time data pipelines. Integrated AI models for portfolio diversification, risk assessment, and asset allocation. Delivered intelligent recommendations and dynamic visualizations, improving analysis efficiency by 65%. Designed backend for high availability and low-latency queries.
- **ToDo Using Spring Boot (Microservices, Auth, API Security):** Developed RESTful microservices with complete CRUD operations and role-based authentication/authorization. Implemented secure endpoints with JWT and API documentation via Swagger. Focused on scalability and maintainability, achieving a 90% improvement in development speed and compliance with security standards.

## CERTIFICATION

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
- Certified as Problem Solver on Hacker Rank

## EDUCATION

- **Sandip Institute of Technology and Research Center, (SPPU)** Nashik, India  
*Bachelor of Engineering - Computer Engineering; GPA: 8.7* 2020 - 2023
- **Government Polytechnic, Dhule, (MSBTE)** Dhule, India  
*Diploma - Computer Engineering; Aggregate: 84.40* 2017 - 2020
