PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years of industry experience delivering high-performance, cloud-native applications and distributed backend services. Skilled in C++ and Python, with expertise in microservices architecture, API development, and containerized deployments using Docker and Kubernetes. Recognized for building scalable, secure solutions and achieving measurable performance improvements, backed by hackathon wins and competitive programming achievements.

SKILLS

- **Languages:** C++, Python, Java, JavaScript, SQL, Dart, Go (learning)
- **Cloud Technologies:** AWS, OCI, Docker, Kubernetes, Firebase
- **Frameworks:** FastAPI, Spring Boot, Django, Flutter
- **Tools & Platforms :** Git, MySQL, VS Code, Android Studio
- **Core Concepts:** Distributed Systems, Networking (HTTP, gRPC, TCP/IP, TLS), Microservices, REST APIs
- **Soft Skills:** Problem Solving, Leadership, Team Collaboration, Communication, Time Management

EXPERIENCE

- **Decimal Point Analytics** Nashik, India
Software Development Engineer Mar 2024 - Present
 - **Global Dealer Operations & Marketing Platform (FastAPI, Microservices, Cloud):** Designed and implemented 100+ secure microservices and REST APIs with role-based access control, deployed in a multi-cloud environment. Optimized distributed backend processing by 30% through region- and product-level data aggregation across multiple data sources. Strengthened system security and availability with cloud-based deployment and API gateway integration.
 - **Financial Mobile Application (Flutter, Real-Time APIs, WebSockets):** Integrated real-time financial market data APIs using REST and WebSockets, enabling high-throughput and low-latency data streaming. Optimized state management (Riverpod + GetX) to reduce lag by 50%+, ensuring near real-time responsiveness. Built scalable, interactive UI components such as watchlists and financial charts for thousands of concurrent users.
 - **Rent Portal (Django, Distributed Storage, Cloud):** Developed a scalable client portal with role-based access for Admins, Analysts, and Users. Integrated OCI Bucket for distributed file storage and automated large-scale document ingestion (Excel, PDF), improving financial data accuracy by 70%. Applied microservices-based architecture with Git best practices to ensure high availability and maintainability.
 - **Automation Alert System (Python, Data Processing, Scheduling):** Built an event-driven automation system to extract, process, and distribute financial data from multiple sources, reducing manual effort by 80%. Implemented distributed job scheduling and automated email delivery for real-time insights. Enhanced decision-making and operational efficiency by ensuring low-latency, reliable data pipelines.

PROJECTS

- **AI-powered Financial Insights Dashboard (Hackathon, Distributed APIs, Cloud):** Built a scalable, cloud-based financial insights dashboard using microservices and real-time data pipelines. Integrated AI models for portfolio diversification, risk assessment, and asset allocation. Delivered intelligent recommendations and dynamic visualizations, improving analysis efficiency by 65%. Designed backend for high availability and low-latency queries.
- **ToDo Using Spring Boot (Microservices, Auth, API Security):** Developed RESTful microservices with complete CRUD operations and role-based authentication/authorization. Implemented secure endpoints with JWT and API documentation via Swagger. Focused on scalability and maintainability, achieving a 90% improvement in development speed and compliance with security standards.

CERTIFICATION

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
- Certified as Problem Solver on Hacker Rank

EDUCATION

- **Sandip Institute of Technology and Research Centre, (SPPU)** Nashik, India
Bachelor of Engineering - Computer Engineering; GPA: 8.7 2020 - 2023
- **Government Polytechnic, Dhule, (MSBTE)** Dhule, India
Diploma - Computer Engineering; Aggregate: 84.40 2017 - 2020

ACHIEVEMENTS

- Secured 1st position in NashLon hackathon organized by IEEE
- Contributed to internal tools that automated 80%+ of manual workflows at Decimal Point Analytics.
- 3 Star Coder on CodeChef with highest rating 1771
